to Oversight Committee

Funding Cycle

Main Award Funding Cycle
Begins in August

MTRAC Transportation new grant cycle opens January 10!

The Michigan Translational Research and Commercialization (MTRAC) Innovation Hub for Advanced Transportation funds translational research applications to accelerate new high-tech solutions to serve the mobility and advanced transportation industries and is agnostic to the type of transportation (land, sea, air, space, etc.)

The program is open to researchers at all public institutions of higher education, and non-profit research centers in the State of Michigan. *Please note that all awarded projects require a cost share from the investigator/institution.*

Funding areas include and are not limited to:

- Electrification
- Connectivity
- Sustainability
- Infrastructure Tech
- Advanced Driver Assistance Systems (ADAS)
- Manufacturing Solutions
- Supply Chain Solutions
- Robotics

“MTRAC played a crucial role in introducing us to the right potential customers, which really helped us refine our value propositions.”

Muhammad Faisal,
CEO, Movellus

Program Benefits for Researchers & Teams

- Receive up to \$100K through a 12-month grant.
- Awarded project teams are supported by industry experts, mentors and investors.
- Project teams receive ongoing feedback/support on commercialization milestones/funding opportunities throughout the program and beyond.
